DETAILED ACTION

This is an allowance for application 09/694,211 in response to the RCE filed on November 9, 2004 and supplemental response filed on February 24, 2005 in which claims 8-14 are presented for examination.

Drawings

The drawings were received on February 24, 2005. These drawings are not accepted do to informalities.

The drawings are objected to because specific details of Figure 3 are lacking due to faxing of the replacement sheet. Specifically, the connection between the motion compensation (4) and the scaler (L) along with part of the scaler(L) was inadvertently cut off due to faxing. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the

examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 8-14 are allowed.

The following is an examiner's statement of reasons for allowance:

The present claims include novel and unobvious features in that the examiner was unable to find in several prior art searches. For example, the making of a motion-compensated picture signal using past image point information, wherein said past image point information is displaced or shifted to obtain said motion-compensated picture signal according to a product of a scanning rate increase factor and a previously determined motion vector; producing an intermediate picture from a reference picture by increasing scanning rate by said scanning rate increase factor and inserting marker values at intervening points between image points of the reference picture to form an interpolation raster. These features taken with the others in the claims define over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
